

**shown with optional 3 inch plumbing*

Rear view of stairway with safety railings (not standard on 550) and large access panel.

Reliable Material Storage Solutions

NEAL SMT STORAGE TANKS are constructed for the long term storage of coal tar and asphalt emulsions. Our SMT line is built with heavy gauge materials for high durability and quality componentry for reliable agitation and material transfers.

NEAL SMT SYSTEM HIGHLIGHTS

- 550 to 10,000 Gallon Material Capacity
- Heavy gauge materials for high durability
- Operator control panel for mixing and pump control
- Ranger™ gear pump for reliable material transfers
- 3 blade offset agitation for material mixing
- Large material inspection plate for easy access and cleaning
- Twin Cylinder Vanguard™ Engines or 230/460 3 Phase AC power

Sealer Mixer Tank Dimensions

MODEL/ capacity	tank OD	tank length	overall length	overall height	overall width	weight (lbs.)	agitator shaft
550	48"	72"	102"	54"	42"	1,250	1 1/2"
750	48"	96"	136"	61"	52"	1,400	1 1/2"
1,000	64"	72"	102"	70"	58"	1,600	2 15/16"
1,500	64"	108"	138"	70"	58"	1,900	2 15/16"
2,000	72"	114"	144"	82"	66"	2,350	2 15/16"
3,000	84"	127"	157"	94"	78"	3,400	2 15/16"
4,000	84"	170"	200"	96"	78"	7,800	2 15/16"
